Contents

Preface	ix
1 Introduction to Signals	1
1.1 Basics of Signals	5
1.2 Transforming a Signal	11
1.3 Dealing with Complex Numbers	18
1.4 The Concept of Frequency	25
1.5 Sampling a Continuous-Time Signal	36
1.6 Correlation	40
1.7 Discrete Frequency	44
1.8 The Discrete Fourier Transform (DFT)	53
1.9 Effect of Time Shift in Frequency Domain	61
1.10 DFT Examples	67
1.10.1 A Rectangular Signal	67
1.10.2 A General Sinusoid	75
1.10.3 The Unit Impulse	78
1.10.4 The Sampling Sequence	79
1.11 A Digital Signal	82
1.12 The Small Picture	82
2 Introduction to Systems	83
2.1 Linear Systems	86
2.2 Time-Invariant Systems	88
2.3 System Characterization	89
2.4 Convolution	91
2.4.1 Regular Convolution	91
2.4.2 Complex Sinusoids and the Grand Scheme of Things	101
2.4.3 Circular Convolution	103
2.5 Finite Impulse Response (FIR) Filters	110
2.6 Some Useful FIR Filters	118
2.7 Sample Rate Conversion	123
2.7.1 Downsampling	124
2.7.2 Upsampling	131
2.8 Additive White Gaussian Noise (AWGN)	137
2.9 Appendix	141

3	Digital Communication with Linear Modulations	145
3.1	A Simple Communication System	147
3.2	Packing More Bits in One Symbol	149
3.3	Modulation: From Numbers to Signals	151
3.4	Demodulation: From Signals Back to Numbers	153
3.4.1	Matched Filter in Time Domain	156
3.4.2	Matched Filter in Frequency Domain	158
3.5	Pulse Amplitude Modulation (PAM)	163
3.6	Pulse Shaping Filter	171
3.7	Quadrature Amplitude Modulation (QAM)	201
3.8	Stethoscopes for a Communication System	215
3.9	Modulation Bandwidths	222
3.10	Computing Error Rates	223
3.11	Spectral Efficiency	232
4	Phase Locked Loop	235
4.1	What is Synchronization?	237
4.2	Basic Components of a PLL	241
4.3	Phase Error Detector	244
4.4	Proportional + Integrator (PI) Loop Filter	246
4.5	Numerically Controlled Oscillator (NCO)	247
4.6	Designing a PLL	250
4.7	Comments on Locking and Acquisition	263
5	Carrier Phase Synchronization	267
5.1	Effect of Carrier Phase Mismatch	270
5.2	The Fundamental Problem of Synchronization	276
5.3	The Big Picture	279
5.4	Enter the Correlation	281
5.5	Data-Aided/Decision-Directed Techniques	285
5.5.1	Feedforward: Conjugate Product Estimator	285
5.5.2	General Approach to Feedforward Synchronization	292
5.5.3	Feedback: Phase Difference Phase Error Detector	293
5.5.4	General Approach to Feedback Synchronization	304
5.5.5	Feedback: Cross Product Phase Error Detector	305
5.5.6	A Comparison of Phase Error Detectors	320
5.6	Non-Data-Aided Techniques	321
5.6.1	Feedforward: M^{th} ower Estimator	322
5.6.2	Feedback: M^{th} ower Phase Error Detector	324
5.6.3	The Costas Loop: A Classic Solution	326
5.7	Detection Aids	331
5.7.1	Carrier Lock Detector	332
5.7.2	Resolving Phase Ambiguity	333
5.7.3	Cycle Slips, Hangup and the Role of AGC	337
5.8	The Small Picture	338
5.9	Appendix	338

6	Carrier Frequency Synchronization	345
6.1	Effect of Carrier Frequency Mismatch	347
6.2	The Big Picture	353
6.3	Timing-Aided Techniques	355
6.3.1	Enter the Correlation	355
6.3.2	Feedforward: Brute Force Estimator	358
6.3.3	Feedforward: The DFT Estimator	361
6.3.4	Feedforward: Multiple Correlations Estimators	365
6.3.5	A Frequency Locked Loop (FLL)	369
6.3.6	Feedback: Phase Based Frequency Error Detector	370
6.4	Non-Timing-Aided Techniques	377
6.4.1	Feedforward: Delay and Multiply Technique	378
6.4.2	Feedback: Derivative Frequency Error Detector	381
6.4.3	Feedback: Band Edge FLL	396
6.5	The Small Picture	409
6.6	Appendix	410
7	Timing or Clock Synchronization	415
7.1	Effect of Symbol Timing Mismatch	418
7.2	The Big Picture	428
7.3	Enter the Correlation	430
7.3.1	Feedforward: Brute Force Estimator	433
7.4	Why Squaring is Fundamental to Timing Synchronization	435
7.4.1	The Sinusoid Perspective	435
7.4.2	Role of Excess Bandwidth	446
7.4.3	Clock Recovery in Analog Modems	448
7.4.4	Feedforward: Digital Filter and Square Estimator	450
7.5	A Timing Locked Loop (TLL)	453
7.6	Symbol Centric Timing Error Detectors	456
7.6.1	Feedback: Derivative Timing Error Detector	457
7.6.2	Feedback: Early-Late Timing Error Detector	469
7.6.3	Why Symbol Centric?	475
7.7	Feedback: Zero Crossing (Gardner) Timing Error Detector	477
7.8	Interpolation	488
7.8.1	Piecewise Polynomial Interpolation	489
7.8.2	Farrow Structure	496
7.9	Interpolator Control	499
7.9.1	Modulo-1 Counter	500
7.9.2	Computing Basepoint Indices and Fractional Intervals	503
7.10	Sampling Clock Offset	504
7.11	Feedback: Mueller and Muller (M&M) Timing Error Detector	507
7.12	Feedback: Band Edge Timing Error Detector	514
7.13	Polyphase Clock Synchronization	526
7.14	The Small Picture	546
7.15	Appendix	548

8	Wireless Channel and Equalization	555
8.1	A Wireless Channel	558
8.1.1	Multipath Distortion Assuming No Carrier Wave	559
8.1.2	What Happens When a Carrier Wave Enters the Picture	563
8.1.3	Frequency Flat and Frequency Selective Fading	576
8.1.4	Doppler Shift: A Deceptive Villain	581
8.1.5	What Happens When Motion Enters the Picture	589
8.1.6	Time Flat (Slow) and Time Selective (Fast) Fading	595
8.1.7	From Channel Paths to Channel Taps	598
8.1.8	Dealing with a Time-Varying Channel	605
8.1.9	Effect of Channel on Rx Constellation	607
8.2	Channel Estimation	608
8.3	Equalization	612
8.3.1	The Big Picture	613
8.3.2	Brute Force Equalization: ML Sequence Estimation	616
8.3.3	Linear Equalizers	620
8.3.4	Least Mean Square (LMS) Equalizer	631
8.3.5	Decision Feedback Equalization	642
8.3.6	Blind Equalization: Constant Modulus Algorithm (CMA)	648
8.3.7	From Time to Frequency Domain Equalization	651
8.3.8	Single-Carrier Frequency Domain Equalization	653
9	Orthogonal Frequency Division Multiplexing (OFDM)	669
9.1	The Big Picture	672
9.2	How OFDM Works	675
9.2.1	From the Printer Port	675
9.2.2	To a Sliced Bread	692
9.3	An OFDM Transceiver	700
9.4	Timing Synchronization	708
9.5	Carrier Frequency Synchronization	728
9.6	Sampling Clock Synchronization	735
9.7	Channel Estimation	741
9.8	The Small Picture	747
10	The Chapter with No Title	749
10.1	Tx Architecture	753
10.1.1	Polyphase Filterbank Implementation	754
10.2	Rx Architectures	765
10.2.1	Tuned Radio Frequency (TRF) Rx	767
10.2.2	Heterodyne Rx	768
10.2.3	Zero-IF (Direct Conversion) Rx	773
10.2.4	Low-IF and Digital-IF Rx	779
10.2.5	Polyphase Filterbank Implementation	782
10.3	The Origins of Magic	805
10.4	The Small Picture	808
	One Page Summary for Rx Algorithms	809
	Bibliography	809
